# Coding rules with OpenFisca

# An OpenFisca model is a set of rules

- Computable rules only: human decisions are inputs
- Strictly coding the official text reference: line-to-line match
- Users can plug in their own survey or administrative datasets
- 4 key concepts guide the rule analysis

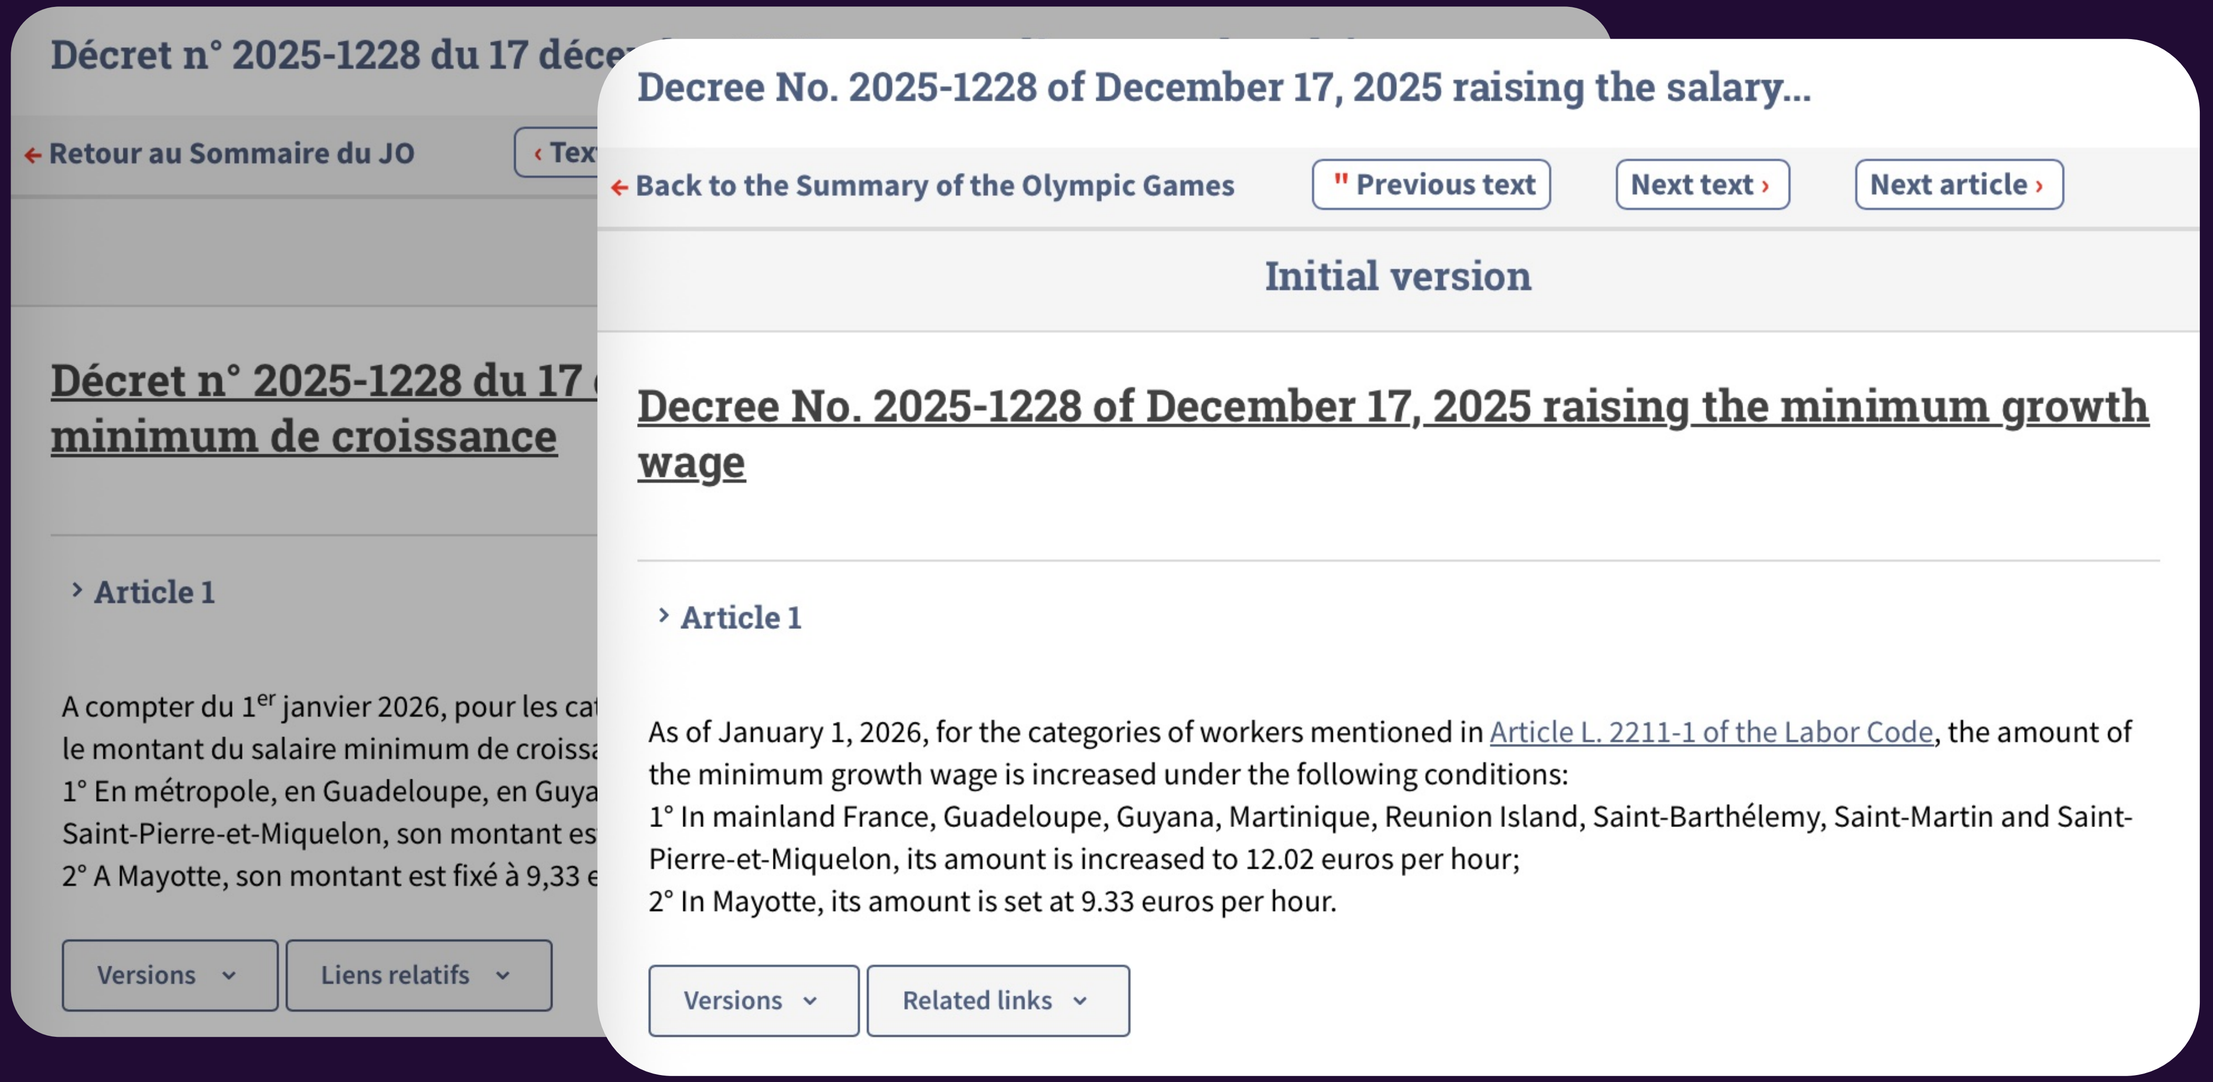

# Rule implementation

Example:

Minimum wage in France

# Rule implementation

› Article 197

Version in force since February 21, 2026

Modified by LAW No. 2026-103 of February 19, 2026 - art. 4(V)

I. - With regard to the taxpayers referred to in Article 4 B, the following rules are applied for the calculation of income tax:

1. The tax is calculated by applying to the fraction of each share of income that exceeds €11,600 the rate of:

– 11% for the fraction greater than €11,600 and less than or equal to €29,579;

– 30% for the fraction greater than €29,579 and less than or equal to €84,577;

– 41% for the fraction greater than €84,577 and less than or equal to €181,917;

– 45% for the fraction greater than €181,917.
